

# From PhD to Entrepreneur: Steps to Starting Your Own Business (Part 1)

The drive to succeed is there. The credentials are unmistakable. But the reward is lacking in substance. You want more than the once or twice monthly paycheck awarded for work that doesn't satisfy your hopes and aspirations. You may consider yourself a parallel career seeker, a DIY career builder, a side hustler, a freelancer, a consultant, or a holder of many passions. If any of these apply to you, you are in the right place, because The Tenured Entrepreneur is dedicated to helping you find that new career path, or find an alternative, better, and more balanced one. Maybe you are just looking to earn a little extra pocket money to supplement your job in academia. Maybe you are looking to branch out and explore other career opportunities. Because you have stumbled upon this, we know that you are an individual who cannot be defined by a single niche or role you want to spread your wings and take advantage of opportunities. Not only that, but you know you have the capabilities. With that, I welcome you on this #tenuredentrepreneur adventure.
