You have to be ever vigilant when it comes to the safety and security of your children. Dangers are everywhere, and sometimes from places you would not suspect. This book covers straightforward and honest advice to help you safeguard your children from potential danger. The lessons throughout are the summation of the best practices I have found from research, documentaries, other parents opinions and my own personal experience. Parents are all aware there are dangers, but never think it can happen to their children. We must educate our children now of potential threats and minimize any possible risk, before something regrettable happens. Risks come from obvious places, but more frequently from not so apparent areas. I am confident that just by reading this book; you will gain insight and learn easy steps you can take now, to help safeguard your children. Our children and their safety are the single most important thing in our lives. The examples and suggestions in the this book are easy to discuss and implement, and will help give you peace of mind knowing your children are prepared.
