

Plant Nematology

Plant Nematology has been designed as per the guidelines provided by the Indian Council of Agricultural Research, New Delhi. This book gives a comprehensive account of various aspects of Phytonematology, including both basic and applied, along with illustrations and descriptions. Fundamentals of sampling, different techniques in Nematology, traditional and molecular taxonomy, nematode anatomy and morphology, interaction with fungi, bacteria, viruses, mycorrhiza, and rhizobia, most common plant-pathogenic genera, historical accomplishments, biology and ecological details along with entomopathogenic nematodes, physiological and molecular Nematology are some of the major fields covered in this book. A detailed glossary of Nematological terms and diversified aspects of nematode management have also been furnished
