

Seven Summits in Church History

The history of Christianity is like that of a great mountain range, with immense length comprised of peaks and valleys, enduring both stormy and prosperous weather. Certain figures in this history have risen to high peaks and represent significant moments in theological development. These figures are the hinge for major swings in the expansion of Christian thought. Duesing offers a quick, yet insightful introduction to seven of the highest peaks worth climbing in church history. His biographical summaries include Augustine, Luther, Calvin, Hubmaier, Edwards, Carey, and Henry. By examining the peaks of Christian history in these seven figures, this book engages several key issues without overwhelming the reader. It is brief but packed with pertinent information any student of history should know.
